Developer:
Immersed Games
Release Date: 3 Jun, 2016

English

I bought the DLC pack but I can't play with it, it takes me to the game page and makes me buy it when I have already bought it.. Dont worry, all the animals are still dehydrated due to the extreme lack of water c:. I bought the DLC pack but I can't play with it, it takes me to the game page and makes me buy it when I have already bought it.. Dont worry, all the animals are still dehydrated due to the extreme lack of water c:. I have played about an hour worth of it now, and I can say it is worth the money. For one, it gives you at least (rounding) 10-12 new animals, 5-7 more plants, even though most are trees, and a new decomposer. Also, the biodome is huge compared to the others, almost twice the size. So heres a list of pros and cons just cause I like doing those: Pros: 1. Many new things 2. One of the first things you get looks like a giant Guinea Pig. Just looks so cute! 3. You get to have what look like under feed deer 4. Only \$4, cheap compared to most DLCs in any game I have seen 5. Bears, big cats, elephants, so many larger animals compared to the other 3 biodomes Cons: 1. Some things are annoying to place, such as Bamboo, you try to make it look nice but its so big you have trouble doing so 2. I think I already put too many of them Guinea pig things so RIP my biodome maybe 3. Still no Dodos Aka, if you got the money, get this DLC..
